1 System Overview

What is Chronexa TimePro?

Chronexa TimePro is a comprehensive, web-based Workforce & Attendance Management System. It unifies employee scheduling, real-time attendance tracking through biometric devices and web punch, leave and permission management, multi-level approval workflows, and detailed reporting within a single, integrated platform.

Role-Based Access

The system operates on a Role-Based Access Control (RBAC) model. Three primary roles govern what each user can see and do:

Role	Modules Accessible	Description
Admin	All modules — Dashboard, Company Master, Organisation, Employee Master, Scheduling, Self Services, Manage Approvals, Reports, Configuration, Settings, Alerts, User Management	Full system access. Configures all master data, roles, and settings.
Manager	Dashboard, Scheduling, Self Services, Manage Approvals, Reports	Manages team schedules, approves leave and punch requests, and views team attendance.
Timekeeper	Self Services, Reports	Records and manages attendance punches for an assigned area and submits missing-punch corrections.
Employee	Dashboard (My Attendance), Self Services	Views personal attendance, submits leave requests, and manages personal punch records.

Module Access Summary

As an Employee, you have access to two modules:

Module	Employee Access
Dashboard — My Attendance	View personal attendance summary, leave balances, and discrepancies.
Self Services — Leaves	Submit leave requests and track their status.
Self Services — Punches (My Punches)	View your personal punch history.

2 Login & Authentication

All users — Admin, Manager, Timekeeper, and Employee — access Chronexa TimePro through the same login screen. After sign-in, the system automatically loads the dashboard and sidebar modules permitted by the user's role.

Login Steps

- Open the Chronexa TimePro URL in your browser (for example, <https://timepro.chronexa.ai>).
- Enter your Username in the first field.
- Enter your Password. Use the eye icon to toggle visibility.
- Optionally select Remember Me to stay signed in.
- Select the LOGIN button.
- Alternatively, select Sign In With Azure AD to authenticate through Microsoft Azure Active Directory.

Forgot Password

Select the Forgot Password? link on the login screen, then enter your registered email address. The system sends a password-reset link to your inbox.

TIP After login, the sidebar reflects only the modules your role permits. As an Employee, you will see Dashboard and Self Services only.

3 Dashboard — My Attendance

ROLE EMPLOYEE

The Dashboard is the first screen after login. For Employee users, the My Attendance tab provides a personal attendance summary for the current month, including leave balances, discrepancies, and leave analytics.

FIGURE 3.1 — Employee Dashboard: Leaves / Permissions Summary

Leaves / Permissions Panel

The top section of the My Attendance page displays a summary of your leave and permission status for the current month:

KPI Card	Meaning
Working Days	Total working days in the current month.
Total Leaves	Total leave entitlement allocated to you.
Leaves Taken	Number of leave days consumed so far.
Monthly Absent	Days you were absent without an approved leave or permission.
Approved Leaves	Leave requests that have been approved by your manager.
Pending Leaves	Leave requests awaiting approval.

Discrepancies Panel

On the right side of the My Attendance page, the Discrepancies panel highlights attendance exceptions:

Discrepancy Type	Meaning
Missed In	Days where your check-in punch was not recorded.
Missed Out	Days where your check-out punch was not recorded.

Leave Analytics

The Leave Analytics chart below the summary cards shows a visual breakdown of your leave usage across the year. Use the year dropdown (e.g. 2026) to switch between calendar years and track your leave patterns over time.

TIP Use the organisation/company filter at the top right and the date picker to scope the dashboard to a specific entity or date.

4 Self Services

ROLE EMPLOYEE

Self Services is the hub for managing your personal leave requests and punch records. As an Employee, you have access to two sub-modules: Leaves and Punches. Navigate to Self Services using the left sidebar.

FIGURE 4.1 — Self Services: My Request (Leaves)

Leaves — My Request

The My Request tab under Self Services > Leaves displays all leave requests you have submitted, along with their current status. You can filter by status and date range to find specific requests.

Column	Description
Leave Type	Category of leave requested (e.g. Annual, Sick, Emergency).
From Date	First day of the requested leave period.
To Date	Last day of the requested leave period.
No of Days	Total number of leave days in the request.
Justification	Reason provided when submitting the leave request.
Attachment	Supporting document uploaded with the request (if any).
Status	Current state: Pending, Approved, or Rejected.

TIP After submitting, the request enters the configured approval workflow. Status changes from Pending to Approved or Rejected once your manager acts on it.

Punches — My Punches

The My Punches tab shows your complete personal punch history — all check-in (IN) and check-out (OUT) transactions recorded by biometric devices or the web application.

Employee No	Employee Name	Transaction Type	Transaction Date	Transaction Time	Remarks
66655544	Gowdaman daman	OUT	2026-05-20	12:34:00	Entry through main gate
66655544	Gowdaman daman	IN	2026-04-18	12:18:49	Punch via IDS integration
66655544	Gowdaman daman	IN	2026-05-02	18:41:06	Punch via IDS integration
66655544	Gowdaman daman	IN	2026-04-15	17:28:14	Punch via IDS integration
66655544	Gowdaman daman	OUT	2026-05-02	03:33:06	Punch via IDS integration
66655544	Gowdaman daman	IN	2026-04-15	17:21:08	Punch via IDS integration
66655544	Gowdaman daman	IN	2026-04-15	14:28:15	Punch via IDS integration

FIGURE 4.2 — Self Services: Manage My Punches

Column	Description	Column	Description
Employee No	Your unique employee number.	Transaction Date	Date the punch was recorded.
Employee Name	Your full name as registered in the system.	Transaction Time	Exact time of the punch.
Transaction Type	IN (check-in) or OUT (check-out).	Remarks	Source or note for the punch (e.g. Punch via IDS integration).

Use the From Date and To Date filters at the top of the page to narrow the list to a specific period.

TIP Your punch records are read-only. If you notice a missing or incorrect punch, contact your manager or timekeeper to submit a Missing Punch correction on your behalf.

Punches — Missing Punches

The Missing Punches tab lists attendance records where either the check-in (IN) or check-out (OUT) punch is absent. Employees can view this list; corrections are submitted by timekeepers or managers.

FIGURE 4.3 — Self Services: Missing Punches List

Employee No	Employee Name	Date	Time In	Time Out	Status
Unique employee number.	Full name of the affected employee.	Date of the missing punch.	Recorded check-in time (or Apply if missing).	Recorded check-out time (or Apply if missing).	Current status of the correction request.

The Apply link appears in the Time In or Time Out column to indicate which punch is missing. Only authorised users can submit corrections. The Status column shows the outcome once a correction has been processed.

Use the From Date, To Date, and Department filters at the top of the page to locate specific records.

5 REPORTS

ROLE EMPLOYEE

The **Reports** module enables employees to generate and review their personal attendance reports for a selected period. The report provides daily, weekly, monthly, and summary views of attendance information, allowing employees to monitor their working hours and attendance records.

FIGURE 5.1 — Employee Time Attendance Report

Employee Time Attendance Report

The **Employee Time Attendance Report** screen allows employees to generate attendance reports by selecting a date range and the required report view.

The page provides four report options:

Report Type	Description
Daily	Displays attendance details for each day within the selected date range, including punch-in/out timings, working hours, and attendance status.
Weekly	Groups attendance records by week, allowing users to review weekly attendance patterns and employee activity.
Monthly	Provides a monthly overview of attendance, including total working days, absences, leave records, and recorded punch details.
Summary	Displays a consolidated attendance summary for the selected date range, providing key attendance statistics for quick review and reporting.

Generating a Report

To generate an attendance report:

1. Navigate to **Reports** → **Employee Reports** from the left navigation menu.
2. Select the required report type:
 - Daily
 - Weekly
 - Monthly
 - Summary
3. Select the **From Date**.
4. Select the **To Date**.
5. Click **VIEW REPORT**.
6. The report is displayed on the screen.
7. If required, export the displayed report to PDF or CSV.

TIP If you see your name in the Missing Punches list, inform your timekeeper or manager immediately so they can submit the correction before payroll processing.

Appendix A — Employee Module Summary

Module / Tab	Employee Access	Description
Dashboard — My Attendance	View	Personal attendance KPIs, leave balances, and discrepancy flags.
Self Services — Leaves (My Request)	View	track existing ones.
Self Services — Punches (My Punches)	View	View personal punch history (read-only).
Self Services — Punches (Missing Punches)	View	View missing punch records (corrections submitted by authorised users only).

Appendix B — Glossary

Term	Definition
RBAC	Role-Based Access Control — the system that governs what each user can see and do.
Punch	A clock-in (IN) or clock-out (OUT) transaction recorded by a device or web interface.
Missing Punch	A punch record where either the IN or OUT is absent for an employee on a given date.
Geofencing	Restricting web punches to a GPS radius around a registered location.
Schedule	A shift template defining In Time, Out Time, and required work hours.
Workflow	An approval chain defining who must approve a leave, permission, or punch request.
Leave Type	Category of leave an employee can request (e.g. Annual, Sick, Emergency).
Coverage	Percentage of employees present versus total scheduled for a department.
KPI	Key Performance Indicator — metrics shown on the dashboard.
Azure AD	Microsoft Azure Active Directory — used for single sign-on to Chronexa TimePro.
Discrepancy	An attendance exception such as a missed check-in or check-out.
SAP ID	Employee identifier used to synchronise with the SAP HR system.
