1 System Overview

What is Chronexa TimePro?

Chronexa TimePro is a comprehensive, web-based Workforce & Attendance Management System. It unifies employee scheduling, real-time attendance tracking through biometric devices and web punch, leave and permission management, multi-level approval workflows, and detailed reporting within a single, integrated platform.

Role-Based Access

The system operates on a Role-Based Access Control (RBAC) model. Three primary roles govern what each user can see and do:

Role	Modules Accessible	Description
Admin	All modules — Dashboard, Company Master, Organisation, Employee Master, Scheduling, Self Services, Manage Approvals, Reports, Configuration, Settings, Alerts, User Management	Full system access. Configures all master data, roles, and settings.
Manager	Dashboard, Scheduling, Self Services, Manage Approvals, Reports	Manages team schedules, approves leave and punch requests, and views team attendance.
Timekeeper	Self Services, Reports	Records and manages attendance punches for an assigned area and submits missing-punch corrections.

Module Access Summary

Module	Admin	Manager	Timekeeper
Dashboard — User Insights	✓	✓ (limited)	—
Company Master	✓	—	—
Organisation	✓	—	—
Employee Master	✓	—	—
Scheduling	✓	✓	—
Self Services — Punches	✓	✓ (Team)	✓ (My & Team)
Self Services — Leaves	✓	✓ (Team)	—
Self Services — Permissions	✓	✓ (Team)	—
Manage Approvals	✓	✓	—
Reports	✓	✓	✓
Configuration / Roles	✓	—	—

Module	Admin	Manager	Timekeeper
Settings	✓	—	—
Alerts	✓	—	—
User Management	✓	—	—

2 Login & Authentication

All users — Admin, Manager, and Timekeeper — access Chronexa TimePro through the same login screen. After sign-in, the system automatically loads the dashboard and sidebar modules permitted by the user's role.

Login Steps

1. Open the Chronexa TimePro URL in your browser (for example, <https://timepro.chronexa.ai>).
2. Enter your **Username** in the first field.
3. Enter your **Password**. Use the eye icon to toggle visibility.
4. Optionally select **Remember Me** to stay signed in.
5. Select the **LOGIN** button.
6. Alternatively, select **Sign In With Azure AD** to authenticate through Microsoft Azure Active Directory.

Forgot Password

Select the **Forgot Password?** link on the login screen, then enter your registered email address. The system sends a password-reset link to your inbox.

TIP After login, the sidebar reflects only the modules your role permits. Admins see all 12+ menu items, Managers see four, and Timekeepers see two.

3 Dashboard — User Insights

ROLE ADMIN

The Dashboard is the first screen after login. For Admin users, the **User Insights** tab provides organisation-wide attendance analytics in real time.

FIGURE 3.1 — Admin Dashboard: Locations View (Company Master)

KPI Cards (User Insights)

KPI Card	Value Example	Meaning
CHECK-INS	3355 of 6712	Total employees who punched in today.
CHECK-OUTS	2046	Employees who completed their shift.
ABSENT	1322	Employees with no punch and no approved leave.
ON LEAVE	7	Employees on approved leave today.
NO APP LOGIN	1357	Employees inactive (no app login today).
LICENSE ENABLED	6712	Total active licensed users in the system.

Dashboard Charts

- Hourly Attendance Trend** — line chart showing check-ins and check-outs by hour of day.
- Attendance by Department** — table showing Present count and Coverage % per department.
- Yesterday's Attendance Split** — donut chart: Present, No Licensed, Missed In, Missed Out.
- Overtime & Hours Worked** — average hours, overtime users, early departures, shift coverage.
- Weekly Attendance Trend** — bar chart: Present, Absent, On Leave per day of the week.

TIP Use the organisation/company filter at the top right and the date picker to scope the dashboard to a specific entity or date.

4 Company Master

ROLE ADMIN

Company Master contains reference data used across employee profiles and scheduling. These records must be configured before employees can be created.

FIGURE 4.1 — Company Master: Locations List

Location Code	Location Name	Geo Coordinates	Radius
ADLOC5987	Ministry of education	25.150594,55.719333	200
ADLOC5986	TARGET ENGINEERING CONSTR	23.828522,52.820210	200
ADLOC5985	GULF CATERING AND SUPPORT	23.738968,53.522430	200
ADLOC5984	Nation Towers	24.463808,53.552787	200
ADLOC5983	Department of C	24.464846,54.036454	200
ADLOC5982	Al Jimi Mall	24.244517,55.727000	200
ADLOC5981	ZSC Healthpoint	24.419000,54.453000	200
ADLOC5980	Nasar Basha Mohammed Zabeer	24.501022523005282,54.38845525523933	200
ADLOC5979	Tawi Ash'ab Street - Cycle Track	24.410083,54.878139	200

Locations

Locations define physical work sites used for geofencing attendance punches. Each location has a code, name, GPS coordinates, and a radius (in metres).

Field	Description
Location Code	Unique identifier (for example, ADLOC5987).
Location Name	Descriptive name (for example, Ministry of Education).
Geo Coordinates	Latitude, Longitude in decimal format (for example, 25.150594, 55.719333).
Radius	Geofence radius in metres (default: 200 m).
Country Code	Country associated with the location.
City	City where the location is situated.

How to Add a Location

FIGURE 4.2 — Add Location Dialog

1. Navigate to **Company Master** → **Locations** tab.
2. Select the **+ ADD** button at the top right.
3. Enter the **Location Code** (unique identifier).
4. Enter the **Location Name** in English.
5. Enter **Geo Coordinates** in decimal format (Latitude, Longitude).
6. Enter the geofence **Radius** in metres.
7. Select the **Country Code** from the dropdown.
8. Enter the **City** name.
9. Select **SAVE** to create the record.

Citizenship

FIGURE 4.3 — Add Citizenship Dialog

Citizenship records define the nationality options used in employee profiles.

1. Navigate to **Company Master** → **Citizenship** tab.
2. Select **+ ADD** and choose a country from the dropdown.
3. Select **SAVE**.

Designations

FIGURE 4.4 — Add Designation Dialog

Designations define the job titles assigned to employees.

Field	Description
Designation Code	Unique code for the designation.
Designation Name (English)	Title name in English.

TIP Navigate to Company Master via the left sidebar. Use the + ADD button to create new records, and select the pencil icon to edit any existing record.

5 Organisation

ROLE ADMIN

The Organisation module defines the company hierarchy. It must be configured before employees can be onboarded or schedules created.

FIGURE 5.1 — Organisation Structure Tree

Organisation Type

FIGURE 5.2 — Add Organisation Type Dialog

Organisation Types define the levels of the hierarchy. The project uses three levels:

Hierarchy Level	Type Name	Description
1	ROOT	Top-level root organisation.
2	VERTICAL	Business vertical / division (for example, AE, ECSS, FM).
3	COMPANY	Individual company entity (for example, Estates Investment).

Adding an Organisation

FIGURE 5.3 — Add Organisation Dialog

1. Navigate to **Organisation** → **Organisation** tab.
2. Select **+ ADD**.
3. Select **Parent Type** (ROOT / VERTICAL / COMPANY).
4. Select the **Parent** organisation from the dropdown.
5. Choose the **Organisation Type**.
6. Enter the **Organisation Code**.
7. Enter the **Organisation Name** in English.
8. Select **SAVE**.

Organisation Structure

The Organisation Structure tab renders a visual hierarchy tree of all organisation units, making it easy to verify parent-child relationships.

Departments

Departments belong to a specific Organisation. Each record has a Department Code and Department Name. The system currently holds 219 departments.

Delegation

Delegation assigns an acting manager when the primary manager is absent. Configure a delegate user, scope (team / org), and the from/to date range.

6 Employee Master

ROLE ADMIN

Employee Types

FIGURE 6.1 — Add Employee Type Dialog

Employee Types classify employees. The project has four types:

Employee Code	Employee Type
Professional Direct	Professional Direct
Professional Indirect	Professional Indirect
Technical	Technical
Outsource	Outsource

Employee Groups

FIGURE 6.2 — Add Employee Group Dialog

The screenshot shows a web browser window with the URL `localhost:3000/employee-master/employee-group`. A modal dialog titled "EMPLOYEE GROUP" is open. It has two checkboxes at the top: "Schedule" and "Reporting Group". Below these are four input fields: "Group Code*" with a placeholder "Enter Employee Group code", "Group Name (English)*" with a placeholder "Enter Employee Group name", "Group Start Date" with a placeholder "Choose Date" and a calendar icon, and "Group End Date" with a placeholder "Choose Date" and a calendar icon. At the bottom of the dialog are "Cancel" and "SAVE" buttons. The "SAVE" button is blue and highlighted. The background shows a sidebar with navigation links and a main content area with tabs for "Employee Type", "Employee Group", and "Employee".

Employee Groups bundle employees for bulk scheduling or reporting. Configure Group Code, Group Name, Start/End Dates, and whether the group is a Schedule group or a Reporting group.

Adding an Employee

Employee onboarding follows a multi-step form with four sections: Personal, Credentials, Official, and Flags.

Step 1 — Personal Information

FIGURE 6.3 — *Employee Personal Info Form*

Field	Description	Required
Emp No	Unique employee number.	Yes
First Name (English)	Employee's first name.	Yes
Last Name (English)	Employee's last name.	Yes
Join Date	Date of joining.	No
Mobile	Mobile phone number.	No
Email	Email for notifications and login.	No
Employee System Activation	Date when system access is activated.	No
Inactive Date	Date when the employee becomes inactive.	No
Card	Biometric card number.	No
Pin	Biometric device PIN.	No

Step 2 — Credentials

FIGURE 6.4 — *Employee Credentials Form*

The screenshot shows the 'Employee Master' section of the Chronexa TimePro application. The 'Credentials' tab is active, displaying a form for adding a new employee. The form includes a 'Username' field with a placeholder 'Enter the username', a 'Password' field with a placeholder 'Click \'Create Password\'', and a 'CREATE PASSWORD' button. Below the password field, there are 'Back' and 'NEXT' buttons. The 'Official' and 'Flags' tabs are also visible below the 'Credentials' tab. The left sidebar contains a navigation menu with options like Dashboard, Company Master, Organization, Employee Master, Scheduling, Self Services, Manage Approvals, Reports, Configuration, Settings, Alerts, and User Management. The top right corner shows the user profile 'Sree ADMIN'.

Enter the Username and use the **CREATE PASSWORD** button to auto-generate a secure password. Select **NEXT** to proceed.

Step 3 — Official Information

FIGURE 6.5 — *Employee Official Info Form*

The screenshot displays the 'Employee Official Info Form' in the Chronexa TimePro application. The form is titled 'Official' and is located at the URL `localhost:3000/employee-master/employee/add`. The left sidebar contains a navigation menu with the following items: Dashboard, Company Master, Organization, **Employee Master** (highlighted), Scheduling, Self Services, Manage Approvals, Reports, Configuration, Settings, Alerts, and User Management. The top right corner shows the user profile 'Sree ADMIN'. The form itself contains the following fields:

- Manager Flag**: A checkbox.
- Vertical**: A dropdown menu with the text 'Choose Vertical'.
- Employee Type**: A dropdown menu with the text 'Choose Employee Type'.
- Citizenship**: A dropdown menu with the text 'Choose Citizenship'.
- Grade**: A dropdown menu with the text 'Choose Grade'.
- Organization**: A dropdown menu with the text 'Choose Organization'.
- Locations**: A dropdown menu with the text 'Choose Location'.
- Designation**: A dropdown menu with the text 'Choose Designation'.
- Manager**: A dropdown menu with the text 'Choose Manager' and a red prohibition icon.

At the bottom right of the form, there are two buttons: 'Back' and 'NEXT'.

Field	Description
Vertical	Business vertical assigned.
Organisation	Company / org unit.
Employee Type	Classification (Professional Direct, etc.).
Locations	Primary work location.
Citizenship	Employee nationality.
Designation	Job title.
Grade	Pay grade.
Manager	Reporting manager.
Manager Flag	Select to designate this employee as a manager.

Step 4 — Flags

FIGURE 6.6 — *Employee Flags*

Flags control feature access for each employee. Key flags to enable:

Flag	Purpose	Default
Active	Employee is active in the system.	Enabled
Punch	Employee can record attendance punches.	Enabled
On Report	Employee appears in attendance reports.	Enabled
Overtime	Eligible for overtime calculation.	Off
Inpayroll	Included in payroll processing.	Off
Email Notification	Receives system email alerts.	Off
Web Punch	Can punch in/out via browser.	Off
Open Shift	Can be assigned open/flexible shifts.	Off
Shift	Uses fixed shift scheduling.	Off
Geo Fence	Attendance restricted by geofence location.	Off
Check In/Out Selfie	Must take a selfie when punching.	Off
SAP User	Synced with the SAP HR system.	Off

Flag	Purpose	Default
Local User	Local-only account (no Azure AD sync).	Off
Calculate Monthly Missed Hours	Track missed hours on a monthly basis.	Off

TIP The Active, Punch, and On Report flags should always be enabled for regular employees. The in-application note confirms this requirement.

1. After setting all flags, select **SAVE** to create the employee record.

7 Scheduling

ROLE ADMIN

The Scheduling module manages shift templates, weekly patterns, public holidays, and Ramadan period dates. These must be configured before employees can be assigned to schedules.

Schedules

FIGURE 7.1 — Add Schedule (Normal Tab)

Schedules define individual shift templates. Each schedule has a unique code, colour, in/out times, and working hours.

Field	Description	Required
Organisation	The org unit this schedule belongs to.	Yes
Schedule Location	Physical location associated with the schedule.	No
Code	Unique short code for the schedule.	Yes
Color	Visual colour shown on calendar views (hex).	Yes
In Time	Shift start time.	Yes
Out Time	Shift end time.	Yes
Required Work Hours	Auto-calculated from In/Out times.	Auto
Flexible (Minutes)	Grace window in minutes.	No

Schedule Policy Tab

FIGURE 7.2 — Schedule Policy Tab

The screenshot shows the Chronexa TimePro interface. On the left is a sidebar menu with options: Dashboard, Company Master, Organization, Employee Master, Scheduling (highlighted), Self Services, Manage Approvals, Reports, Configuration, Settings, Alerts, and User Management. The main content area is titled 'Scheduling / Schedules / Add'. It has tabs for 'Schedules', 'Weekly Schedule', 'Holidays', and 'Ramadan Dates'. The 'Schedules' tab is active, and the 'Policy' sub-tab is selected. The 'Policy' tab contains several settings:

- Show On Report :** Radio buttons for 'First In/Last Out' (selected) and 'All Transactions'.
- Email Notification :** Radio buttons for 'First In/Last Out' (selected) and 'All Transactions'.
- ☐ Calculate Worked Hours From Schedule Start Time
- ☐ Enable Default Overtime
- ☐ Enable Default Break Hours
- ☐ Override Schedule On Holiday
- ☐ Reduce Required Hours If Personal Permission Is Approved

At the bottom right of the form are 'Cancel' and 'Save' buttons. The Windows taskbar is visible at the very bottom.

Policy Option	Description
Show On Report: First In / Last Out	Report shows only the first check-in and last check-out.
Show On Report: All Transactions	Report shows every punch transaction.
Email Notification: First In / Last Out	Email sent for first-in and last-out only.
Calculate Worked Hours From Schedule Start Time	Calculates hours from the scheduled start, not the actual punch-in.

Policy Option	Description
Enable Default Overtime	Automatically flags hours beyond scheduled time as overtime.
Enable Default Break Hours	Subtracts a fixed break period from worked hours.
Override Schedule On Holiday	Schedule applies even on public holidays.
Reduce Required Hours If Personal Permission Is Approved	Approved permissions reduce the required work hours for that day.

Holidays

FIGURE 7.3 — Add Holiday Dialog

Holidays record non-working days for the organisation.

Field	Description
Holiday Name (English)	Descriptive name (for example, National Day).
Remarks	Optional notes.
From Date	Start date of the holiday.
To Date	End date (same as From Date for single-day holidays).
Recurring	Select if the holiday repeats annually.
Public Holiday	Select if this is a public holiday for all employees.

Ramadan Dates

FIGURE 7.4 — *Ramadan Dates List*

Ramadan Dates define the Ramadan period so the system can apply reduced working hours automatically. Currently configured: Ramadan 2026 (18 Feb 2026 — 20 Mar 2026).

1. Select **+ ADD** to enter a new Ramadan period.
2. Enter the **Ramadan Name**, **From Date**, and **To Date**.
3. Select **SAVE**.

8 Self Services

ROLE ADMIN

Self Services is the hub for employee requests, approvals, and punch management. Admins have access to all sub-modules: **Workflow**, **Permissions**, **Leaves**, and **Punches**.

Workflow

FIGURE 8.1 — *Generate Workflow Form*

Workflows define the multi-level approval chain for leaves, permissions, and punch corrections. Configure a workflow by selecting the category (Leave, Permission, Punch), assigning approvers, and generating the chain.

1. Navigate to **Self Services** → **Workflow**. Select **+ ADD**.
2. Enter a **Code** for the workflow.
3. Select the **Workflow category** (Leave / Permission / Missing Punch).
4. Enter a **Workflow Name** in English.
5. Select **GENERATE** to create the approval chain.

Permissions

FIGURE 8.2 — Add Permission Type (Basic Setup)

Permissions allow employees to request early departure, late arrival, or other time exceptions. Admins configure permission types with limits and workflows.

Field	Description
Permission Type Code	Unique code for this permission type.
Permission Type (English)	Name shown to employees.
Workflows	Approval chain to apply.
Gender	Restrict to a specific gender (or All).
Max. Minutes Per Day	Maximum minutes allowed per day.
Max. No. Of Permissions Per Day	Maximum permission instances per day.
Max. Minutes Per Month	Maximum minutes allowed per month.
Max. No. Of Permissions Per Month	Maximum instances per month.

Leaves

Leave types define the categories of leave employees can request (Annual, Sick, Emergency, etc.). Each type is linked to a workflow and has balance/entitlement rules.

FIGURE 8.3 — Leaves: My Request View

The screenshot shows the 'My Request' form in the Chronexa TimePro system. The form is titled 'My Request' and is part of the 'Self Services / Leaves / My Request / Add' path. It contains the following fields:

- Employee ***: Sree (56092)
- Leave Type ***: Choose leave types
- From Date ***: Choose Date
- To Date ***: Choose Date
- Attachment**: Choose File (No file chosen)
- Remarks**: Enter the remarks

At the bottom right, there are 'Cancel' and 'APPLY' buttons.

My Request (Leaves)

Employees (including admin users) can submit leave requests from **Self Services** → **Leaves** → **My Request**.

FIGURE 8.4 — Submit Leave Request Form

The screenshot shows the 'My Request' form in the Chronexa TimePro system, specifically the 'My Request' tab. The form is titled 'My Request' and is part of the 'Self Services / Leaves / My Request' path. It contains the following fields:

- Status**: All
- From Date**: Choose Date
- To Date**: Choose Date

Below these fields is a table with the following columns:

Leave Type	From Date	To Date	No of Days	Justification	Attachment	Status
No data available						

At the bottom, there are '10' records per page and 'No records' at the bottom right.

Field	Description
Employee	Auto-filled with the logged-in employee.
Leave Type	Select from the configured leave types.
From Date	First day of leave.
To Date	Last day of leave.
Attachment	Optional supporting document.
Remarks	Reason for the leave request.

TIP After submitting, the request enters the configured workflow. Status changes from Pending to Approved or Rejected.

Punches — Missing Punches

FIGURE 8.5 — Manual Punches Form

Admins can create manual punch records when employees have missing or incorrect punch entries.

Field	Description
Reason	Punch type (Missing In / Missing Out / Correction).
Date	Date of the missing punch.
Employee Type	Filter employees by type.
Department	Filter by department.

Field	Description
Cost Code	Project / cost code association.
Employee	The employee for whom the punch is being added.
Remarks	Explanation for the manual entry (required).
Attachment	Supporting file (PDF, JPG, PNG — max 5 MB).

9 Manage Approvals

ROLE ADMIN

Manage Approvals is the centralised queue for all pending employee requests. Admins can view and action all request types across all teams.

Sub-Module	Admin Access	Description
Team Requests — Missing Punches	View	Review and approve/reject missing-punch submissions from all teams.
Team Requests — Permissions	View	Review employee permission requests.
Team Requests — Leaves	View	Review leave requests from all employees.

Approving a Missing Punch

1. Navigate to **Manage Approvals** → **Team Requests** → **Missing Punches**.
2. Filter by date range using **From Date** / **To Date**.
3. Review the employee name, date, time, and remarks.
4. Select **Download** to view any supporting attachment.
5. Select the record(s) and choose **Approve** or **Reject**.
6. Add an optional comment before confirming.

The screenshot displays the Chronexa TimePro web application interface. The browser address bar shows the URL: localhost:3000/manage-approvals/team-requests/missing-punches. The application header includes the Chronexa TimePro logo, a search bar, and a user profile for 'Irfan MANAGER'. The left sidebar contains navigation links: 'Scheduling', 'Self Services', 'Manage Approvals' (highlighted), and 'Reports'. The main content area is titled 'Team Requests' and includes a search bar and date filters for 'From Date' and 'To Date'. Below these filters, the 'Missing Punches Approvals' section is visible, featuring a table with columns: 'Employee No', 'Employee Name', 'Date', 'Time', 'Remarks', and 'Attachment'. The table currently displays 'No data available'. At the bottom of the table, there is a 'Records per page' dropdown set to '10' and a 'No records' message. The Windows taskbar at the bottom shows the system clock as 3:37 pm and the temperature as 38°C.

10 Reports

ROLE ADMIN

The Reports module provides the Employee Time Attendance Report, allowing Admins to analyse attendance data across the entire organisation.

FIGURE 10.1 — Employee Time Attendance Report Filters

Report Filters

Filter	Description
Vertical	Filter by business vertical.
Company	Filter by company / organisation.
Department	Filter by a specific department.
Employee Type	Professional Direct, Indirect, Technical, Outsource.
Manager	Filter by reporting manager.
Employee	Filter for a specific individual.
From Date / To Date	Custom date range for the report period.

FIGURE 10.2 — Report Preview (Employee Attendance Data)

Emp No	Employee Name	Parent Organization	Organization	Department	Employee Type	Work Date	Work Day	Shift	Punch In	Punch Out	Daily Worked Hrs	Daily Missed Hrs
100771	Erika Rogna	PM	UAE - Provis Corporate	Finance	Professional Indirec	01-09-2025	Monday	-	-	-	-	-

81057	Carol Jamal	ICS	Basatin Landscaping	Operations - Design (Basatin)	Professional Indirec	01-09-2025	Monday	Day Shift	10:40:20	18:04:03	07:23:43	01:36:1

Report Columns

Column	Description
Emp No	Employee number.
Employee Name	Full name.
Parent Organisation	Top-level org unit.
Organisation	Company / entity.
Department	Department assigned.
Employee Type	Classification.
Work Date	Date of the attendance record.
Work Day	Day of the week.
Shift	Assigned shift code.
Punch In	First check-in time.
Punch Out	Last check-out time.
Daily Worked Hrs	Total hours worked that day.
Daily Missed Hrs	Hours below the required shift hours.

Export Formats

- View the report on screen first (recommended before exporting).
- Export to **PDF** — a printable report with branding.
- Export to **CSV / Excel (XLSX)** — a formatted workbook for data analysis.

11 Configuration & RBAC

ROLE ADMIN

Chronexa uses a Role-Based Access Control (RBAC) model. The Configuration module is where Admins define roles and their exact privileges for every module and sub-tab.

FIGURE 11.1 — Admin Privileges: Dashboard & Company Master

How RBAC Works

Layer	What It Is	Example
Role	Named access profile assigned to users.	Admin, Manager, Timekeeper.
Privilege Flags	Per-module access flags.	View, Create, Edit, Delete per sub-tab.
Vertical Scope / Company	Which org units the role applies to.	Role scoped to the Operations vertical only.

Creating a Role — Step by Step

FIGURE 11.3 — Create New Role Dialog

1. Navigate to **Configuration** → **Roles**. Select **+ ADD**.
2. Enter the **Role Name** (for example, Manager, Timekeeper).
3. Select the **Vertical scope** (which business unit this role covers).
4. Select the **Company scope** (dependent on the Vertical selection).
5. Select **Editable** if the role's privileges should be adjustable.
6. Select **SAVE** to create the role shell.
7. In the privilege grid that appears, toggle **View, Create, Edit, Delete** flags per module.
8. Select **SAVE** to finalise the privileges.

The screenshot displays the 'configuration/roles' page for the Admin Role. The 'Employee Master' module is active, showing a table with columns: Sub-Module / Tab, View, Create, Edit, and Delete. The 'Scheduling' module is also visible, showing a table with columns: Sub-Module / Tab, View, Create, Edit, and Delete.

Sub-Module / Tab	View	Create	Edit	Delete
Select All	☐	☐	☐	☐

Punches	☒	☒	☒	☐
↳ My Punches	☒	☐	☐	☐
↳ Team Punches	☒	☐	☐	☐
↳ Missing Punches	☒	☒	☒	☐

The screenshot displays the Chronexa TimePro Admin Role configuration page. The page is divided into several sections, each with a table of sub-modules and their corresponding actions (View, Create, Edit, Delete). The sections are: Manage Approvals, Devices, Reports, Configuration, and Settings. The 'Manage Approvals' section shows 'Team Requests' and 'Missing Punches' with 'View' and 'Delete' actions enabled. The 'Devices' section shows 'Device Status' with 'Create', 'Edit', and 'Delete' actions enabled. The 'Reports' section shows 'Employee Reports' with 'View', 'Create', 'Edit', and 'Delete' actions enabled. The 'Configuration' section shows 'Roles' with 'View', 'Create', 'Edit', and 'Delete' actions enabled. The 'Settings' section shows 'DB Settings', 'Email Settings', and 'App Settings' with 'View' and 'Delete' actions enabled.

Assigning a Role to a User

FIGURE 11.8 — Add User to Admin Role

1. After creating the role, select the role row in the Roles list.
2. Select **+ ADD USER** (or the assign icon) to open the user picker.
3. Search for the user by name or SAP ID.
4. Select the user(s) and choose **ASSIGN ROLE**.

TIP Role assignment determines exactly what the user can see and do. Always verify the privilege flags after assigning a role to a new user.

12 Settings

ROLE ADMIN

DB Settings

The DB Settings tab connects Chronexa to its backend biometric device databases. Fields include Database, Database Name, Host, Port, and Connection status.

Email Settings

Email Settings configures the SMTP gateway for system notifications. The project has one active email configuration:

Field	Value
Name	TA_Project
From Email	(configured — masked for security)
Active	Yes
Test Email	Send — to verify SMTP connectivity.

App Settings

App Settings controls global application parameters such as session timeout, date format, and language preferences.

13 Alerts

ROLE ADMIN

The Alerts module shows all outbound email and SMS notifications generated by the system. Admins can filter by status and date range and export the log.

Column	Description
Email	Recipient email address(es).
Subject	Email subject line.
Body	Preview of the email body.
Status	Processed / Pending / Failed.
Sent At	Timestamp of delivery.
CC Email	Carbon-copy recipient(s).

14 User Management

ROLE ADMIN

User Management administers system login accounts. 10,526 users are registered. Each user record links to an employee profile and determines login credentials and license status.

FIGURE 14.1 — Create User Dialog

Creating a User

1. Navigate to **User Management** → **Users**. Select **+ ADD**.
2. Enter the **Username** (typically email format, for example, xxx@chronexa.ai).
3. Set the **Password**.
4. Select the linked **Employee** record.
5. Choose the **App Type** (Web / Mobile).
6. Toggle **License** ON to grant system access.
7. Toggle **Web App** if the user should access via browser.
8. Select **SAVE**.

User List Columns

Column	Description
Number	Employee number.
Name	Full name.
Email	Login email address.
Username	System username.
Password	Masked — Update button to reset.
License	Enabled / Disabled — controls login access.

TIP Filter the user list by License (All / Enabled / Disabled) and App Type. Select the pencil icon to edit a user's role assignment or license status.

Appendix A — Role Privilege Summary

The table below consolidates the exact privilege flags granted to each role across every module and sub-tab.

Appendix B — Glossary

Term	Definition
RBAC	Role-Based Access Control — the system that governs what each user can see and do.
Punch	A clock-in (IN) or clock-out (OUT) transaction recorded by a device or web interface.
Missing Punch	A punch record where either the IN or OUT is absent for an employee on a given date.
Geofencing	Restricting web punches to a GPS radius around a registered location.
Schedule	A shift template defining In Time, Out Time, and required work hours.
Weekly Schedule	A repeating 7-day pattern assigned to an org unit or individual employee.
Monthly Schedule	A calendar-based roster assigning schedule codes per employee per day.
Workflow	An approval chain defining who must approve a leave, permission, or punch request.
Vertical	Top-level organisational unit in the hierarchy (ROOT → VERTICAL → COMPANY).
Azure AD	Microsoft Azure Active Directory — used for single sign-on to Chronexa TimePro.
Timekeeper	A role focused on recording and correcting attendance punches for a site or area.
Coverage	Percentage of employees present versus total scheduled for a department.
Delegation	Temporary assignment of manager duties to another user during an absence.
KPI	Key Performance Indicator — metrics shown on the dashboard.
SAP ID	Employee identifier used to synchronise with the SAP HR system.
